WORK EXPERIENCE

SCHBANG | Junior Frontend Engineer   Mumbai | Dec 2023 – Present

- Developed and integrated reusable React components, leveraging the Redux ecosystem, to interact with robust backend services through RESTful APIs. This collaboration with the backend team enhanced internal operations for over 1,200 internal users.
- Collaborated with cross-functional teams, including designers, to ship beautiful and user-friendly, interactive front end experiences across web and mobile using GSAP and Framer Motion, enhancing user experiences.
- Leveraged code reviews, unit testing, and agile methodologies to boost app performance by improving code quality by 25% and halve data breach risks through robust API security, enhancing user experience.
- Seamlessly integrated APIs and collaborated with back end developers to deliver dynamic content, ensuring an engaging UI and optimizing frontend performance.
- Delivered a 35% increase in web traffic and performance optimization by enhancing site scalability, including code minimization using best practices.

SCHBANG | Developer Intern   Mumbai | Sep 2023 - Dec 2023

- Built CMS-driven pages using HTML5, CSS3, and Javascript, creating responsive UI for seamless performance across devices, significantly improving website experience.
- Implemented functional code from design mockups using Material-UI and Bootstrap, troubleshooting and resolving code issues with attention to detail.

RED FIBRE | Frontend Developer Intern   Navi Mumbai | Mar 2022 – Aug 2022

- Enhanced team collaboration and task completion by 70% through strong communication and coordination skills, facilitating effective problem-solving throughout the project.
- Adopted a mobile-first responsive approach for cross-browser compatibility, meeting high design standards.

PROJECTS

DOCTOR APPOINTMENT BOOKING ⬈   May 2024 - Jul 2024

- Built a scalable Next.js application for medical appointments, leveraging asynchronous data fetching to provide real-time search results for available doctors.
- Created comprehensive documentation, detailing instructions, features, and usage guidelines.

NETFLIX-CLONE ⬈   Aug 2022 - Oct 2022

- A React.js NetFlix Homepage Clone.
- Used the TMDB API to provide movie details, cast, and recommendations, enhancing discovery of similar content.
